DECLARATION OF PATRICK J. FARLEY, PH.D.

Assistant Commissioner for Patents
Washington, DC 20231

Sir:

I, Patrick J. Farley, am an associate in the law firm of Schnader Harrison Segal & Lewis, LLP. I hold a Ph.D. in molecular biology and biotechnology, and am thoroughly familiar with the art relating to nucleotide and amino acid sequences. I have been asked by Austin R. Miller to review the enclosed Sequence Listing for accuracy. I hereby declare that I have faithfully done so and that the enclosed Sequence Listing is accurate. I further state that a number of minor corrections have been made to the enclosed Sequence Listing from that submitted on September 29, 1998. These are minor typographical errors, and add no new matter. These are as follows:

1. The designation for isoleucine was incorrectly given as "Ile". This has been changed to the correct designation "Ile" in the following locations. In Sequence No. 1 amino acid position 405; in Sequence No. 2 at amino acid positions -15, -12, -9, 19, 69, 91, 94, 123, 162, 176, 221, 235, 245, 273, 299, 311, 314.

2. The designation for asparagine was incorrectly designated as "Ans" at

Sequence No. 1, position 16. This has been changed to the correct designation for asparagine "Asn".

3. The amino acid Tyrosine was incorrectly designated as "Try". This has been changed to the correct designation "Tyr" in the following locations. In Sequence No. 1 amino acid positions 249, and 309.

The Sequence Listing is also now generated from WordPerfect 8.0 rather than WordPerfect 5.1. The Sequence Listing now also designates the related applications JP 9-15118 filed January 29, 1997, and JP 9-234544 filed August 29, 1997.

I also confirm that the computer readable copy and the printed copy of the Sequence Listing are the same.

The undersigned declares that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and thus such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Date: Jan. 5, 2000

Patrick J. Farley
